

## Autostat WT

### Product data sheet

Heat stabilised polyester film has low residual shrinkage at elevated temperatures. This is essential when tight registration tolerances need to be maintained during multiple printing operations.

#### PRODUCT DESCRIPTION

The Autostat WT is a white, high quality stabilised polyester film, adhesion treated on both sides, available in sheets and rolls.

#### Product Range:

Autostat WT3 Opaque white satin finish, adhesion treated, 75 micron

Autostat WT5 Opaque white satin finish, adhesion treated, 125 micron

#### PRODUCT APPLICATIONS

Autostat WT can be used as a general printing substrate where a white background is required e.g. labels, insert graphics. As top circuitry layers, Autostat WT backs up colours on the graphics overlay increasing their opacity whilst totally hiding the circuitry underneath. The white colour also acts as an excellent reflector for surface mount LED's.

#### PRODUCT PERFORMANCE

Thermal	Autostat WT	Test Method
Dimensional stability		
WT3	MD $\leq 0.5\%$ max, TD $\pm 0.1\%$ max	MacDermid Autotype Method <sup>1</sup> 150 °C/30 minutes
WT5	MD $\leq 0.2\%$ max, TD $\pm 0.08\%$ max + indicates expansion - indicates shrinkage	

<sup>1</sup> See Test Method Manual

#### TD (transverse direction) shrinkage at 150 °C for 30 minutes

TD shrinkage is much lower than MD shrinkage and may even be completely absent. When the film does not shrink at all a small positive expansion may take place.

#### INK ADHESION

The adhesion treatment used on the WT grades uses the industry standard chemistry and is present on both sides of the film. This treatment enhances adhesion of UV curable dielectric ink, but may not be fully compatible with certain conductive silver inks. We recommend full internal testing.

**CHEMICAL PROPERTIES**

Property	Autostat WT	Test Method
Moisture vapour transmission rate (MVTR) <sup>1</sup>	2.3g/m <sup>2</sup> /24 hours (WT5)	ASTM F372-73
Oxygen transmission rate <sup>1</sup>	6.5ml/m <sup>2</sup> /24 hours (WT5)	ASTM D1434-82 @ 25°C, 77% RH

<sup>1</sup> Data is derived from the base manufacturer's literature

**ELECTRICAL PROPERTIES**

Property	Autostat WT	Test Method
Surface Resistivity <sup>1</sup>		
WT3	10 <sup>14</sup>	ASTM D257-83
WT5	>10 <sup>14</sup>	at 55% RH
Dielectric Constant <sup>1</sup>		
WT3	3.3	ASTM D150-81
WT5	2.6	23°C 50 Hz

<sup>1</sup> Data is derived from the base manufacturer's literature

**MECHANICAL PROPERTIES**

Property	Autostat WT	Test Method
Elongation at break <sup>1</sup>		
WT3	90% (TD) 150% (MD)	ISO 527-1-2 23°C 50% R.H
WT5	120% (TD and MD)	ASTM D882-83
Tensile strength at break <sup>1</sup>		
WT3	150 N/mm <sup>2</sup> MD, 190 N/mm <sup>2</sup> TD	ISO 527-1-2 23°C 50% R.H
WT5	150 N/mm <sup>2</sup> MD, 180 N/mm <sup>2</sup> TD	ASTM D882A

<sup>1</sup> Data is derived from the base manufacturer's literature

**OPTICAL PROPERTIES**

Property	Autostat WT	Test Method
Total luminous transmission <sup>1</sup>		
WT3	12±2 %	ASTM D1003
WT5	6±2 %	
Yellowness index <sup>2</sup>		
WT3	-3.2	ASTM-D 1925-63T
WT5	-3.4	(reflection mode)
CIE *Lab L <sup>1</sup>		
WT3	96	ASTM E313-79
WT5	97	
Gloss at 60° angle <sup>2</sup>		
WT3	45	ASTM D2457-03
WT5	67	

<sup>1</sup> Data is derived from the base manufacturer's literature

<sup>2</sup> Typical figures from laboratory measurements

## PHYSICAL PROPERTIES

Property	Autostat WT	Test Method
Density <sup>1</sup>	1.40 – 1.48g/cm <sup>3</sup>	Based on ASTM-D 1505-79
Maximum processing temperature	150 °C	
Thicknesses	Nominal ± 5%	

<sup>1</sup> Data is typical of polyester films and is derived from the base manufacturer's literature

## MISCELLANEOUS

Property	Autostat WT	Test Method
Roll properties: Skew	<0.1% (10mm in 10m)	

## LEGISLATIVE DIRECTIVES

This product does not knowingly contain any phthalates, or substances listed in the European End-of-Life Vehicles (ELV), Restriction of the use of certain Hazardous Substances in electrical and electronic equipment (RoHS) or Waste Electrical and Electronic Equipment (WEEE) Directives.

EC Regulation 594/91 classifies ozone depleting substances into a number of different groups, I-VI. Autostat WT does NOT contain any substance classified in groups I-VI nor have any of the substances been used by MacDermid Autotype during manufacture. For details of the content of each of the groups, please see separate ozone depleting substances document

## Revision 140320154446HB #5

The information and recommendations in this publication are believed to be accurate and are offered in good faith but do not constitute specifications. Suggestions concerning uses and applications are only the opinion of MacDermid Autotype Limited and users should carry out their own testing procedures to confirm suitability for their purposes. Except in the case of death or personal injury caused by the materials, MacDermid Autotype Limited MAKES NO WARRANTY OF ANY KIND AND EXCLUDES ANY STATUTORY WARRANTY EXPRESS OR IMPLIED other than that materials conform to their current applicable standard specification. Statements herein therefore should not be construed as guarantees of satisfactory quality or fitness for purpose. The responsibility of MacDermid Autotype Limited for claims arising out of breach of guarantee, negligence, strict liability or otherwise is limited to the purchase price of the material. Suggestions concerning working practices and procedures are based on the practices adopted by existing users of the products and are made in good faith. IT IS THE RESPONSIBILITY OF THE USER TO ENSURE THAT ALL RELEVANT HEALTH AND SAFETY LAWS AND REGULATIONS ARE COMPLIED WITH. MacDermid Autotype Limited does not provide any advice on such laws and regulations and accepts no responsibility, express or implied, for breach of such regulations. Statements concerning the use of products described herein should not be construed as recommending the infringement of any patent and no liability for infringement arising out of such use is assumed.
